

# H.I.P.E.

Hospital In-Patient Enquiry

**2007**

## **INSTRUCTION MANUAL**

01.01.07

HIPE Unit, Health Policy & Information Division,  
ESRI.

# INSTRUCTIONS FOR THE CODER

Before you begin, make sure you have...

- ICD-10-AM classification:  
5 Volume book set (4<sup>th</sup> Edition) or e-Book
- White ICD-10-AM training binder (as issued at training courses)
- Instruction Manual
- **Irish Coding Standards**
- Record summary sheets (if required)
- *All above supplied by HIPE Unit, ESRI.*

Also..

- Medical Dictionary e.g. Dorland's.
- M.I.M.S. - Index of Drugs

---

**For Help....**

## Coding Manager

 Jacqui Curley 01-8632000

## Audit

 Danielle Calvert 01- 8632000

## Training

 Marie Glynn 01-8632000

## Statistics

 Aisling Mulligan (01- 8632000: e-mail [aisling.mulligan@esri.ie](mailto:aisling.mulligan@esri.ie))

(10) <input type="text"/>	<input type="text"/>	<input type="text"/>

Up to 20 procedure codes may be entered on W-HIPE as appropriate - Continue on reverse of sheet if necessary

Date of 1st Procedure

Date of Principal Procedure

Case Entered on W-HIPE:  Comment:

For use on all discharges from 1.1.2007

## All HIPE Data are subject to Audit (including chart based reviews)

**The arrow beside a field below refers to items downloaded by the PAS where available.**

**These fields must always be verified against the information in the chart.**

- 1. Hospital No:** A 3 digit code number allocated to your hospital by the ESRI for HIPE purposes is automatically assigned by the data entry software. This code number differs from the 4-digit Department of Health Hospital codes which are used for transfers to and from the hospital.

- 2. Chart Number:** Up to 7 characters allowed. If less than 7, place zeros before the chart number (or case reference number). Up to 2 alpha characters allowed, again place these before the chart number and in the first position(s).

- 3. Date of Admission:** Enter day, month and year in appropriate boxes, inserting zeros where necessary.

e.g. 1st March 2007 = 

01	03	2007
----	----	------

# Admission codes

## Type of Admission

This indicates the *priority* of the admission.

### ↓ 4. Type of Admission - The *priority* of the admission

#### 1 Elective –

The patient's condition permits adequate time to schedule the availability of suitable accommodation.

An elective admission can be delayed without substantial risk to the health of the individual.

#### 2 Elective Readmission –

Patient admitted electively to continue ongoing treatment or care.

#### 3 Elective Maternity –

The patient is admitted electively related to their obstetrical experience.

(From conception to 6 weeks post delivery).

#### 4 Emergency –

The patient requires immediate care and treatment as a result of a severe, life threatening or potentially disabling condition. Generally, the patient is admitted through the Accident & Emergency Department.

#### 5 Emergency Readmission –

This is an unscheduled readmission following previous spell of treatment in same hospital and relating to the treatment or care previously given.

#### 6 Emergency Maternity –

The patient is admitted as an emergency related to their obstetrical experience.

(From conception to 6 weeks post delivery).

#### 7 New born (0-27 days) –

Neonate admitted to hospital for care or observation. Type of admission '7' will be used for patients;

- up to the age of 28 days (0-27 days old) who are admitted to the hospitals as an emergency or are unplanned.
- Any other neonatal patients (0-27 days old) admitted routinely will be assigned the regular booked admission type codes

### “Type” of **Waiting List** category

When a user indicates that the admission type is either **1- Elective** or **2 - Elective Readmission** a display box appears on the screen to collect if the case is funded by the National Treatment Purchase Fund (NTPF).

**0 – Not NTPF**

**1 – Yes NTPF**

### **Elective MAU Admissions:**

Elective admissions to registered MAUs will record an elective admission type. The admitting ward will record the MAU ward code and the discharge ward will be coded as appropriate.

### **Mode of Emergency Admission**

This information indicates where the patient was treated *prior to being admitted* into the hospital as an inpatient or when the patient was treated only in a registered Medical Assessment Unit (MAU).

When the user chooses **Type of Admissions: 4-7 (Emergency)**, a display box presents the options of:

1 A/E

2 MAU – **Admitted as InPatient.**

This code is assigned if the patient is admitted to the hospital through the MAU.

3 Other

4 Unknown

5 MAU– **Day Only.**

This code is assigned if the patient is admitted as an emergency to the MAU and discharged from there on the same day.

Note: *Once a Medical Assessment Unit has been registered with the Department of Health & Children contact the HIPE Unit IT Department to activate MAU W-HIPE options.*

5. **Source of Admission - *Where the patient was prior to admission.***

- 1 Home
- 2 Transfer from nursing home/convalescent home or other long stay accommodation
- 3 Transfer from Hospital in HIPE listing or transfer from *any* Acute Hospital not specified in HIPE listing (see pages 13 – 15 in this manual).

When the coder enters a transfer (3) as a source of admission the system will respond with a request to identify the hospital in question. This hospital may be entered as a 4-digit code from the table of Department of Health and Children hospital codes.

- 4 Transfer from Non-Acute Hospital not in HIPE listing
- 5 Transfer from hospice not in HIPE listing
- 6 Transfer from psychiatric hospital/unit
- 7 New born
- 8 Temporary place of residence e.g. hotel
- 9 Prison
- 0 Other

6. **Date of Discharge**

Enter the appropriate date in the appropriate boxes inserting zeros where necessary.

e.g. 10<sup>th</sup> March 2007 = 

10	03	2007
----	----	------

7. **Discharge codes** identify the discharge destination

- 00 - Self discharge
- 01 - Home
- 02 - Nursing home, convalescent home or long stay accommodation
- 03 - Transfer to Hospital in HIPE listing or transfer to *any* Acute Hospital not specified in HIPE listing (see pages 13 – 15 in this manual). **Emergency**
- 04 - Transfer to Hospital in HIPE listing or transfer to *any* Acute Hospital not specified in HIPE listing (see pages 13 – 15 in this manual). **Non Emergency**

When the coder enters a transfer (03 or 04) as a discharge code the system will respond with a request to identify the hospital in question. This hospital may be entered by a 4-digit code number from the table of Department of Health and Children hospital codes (See pull down menu on PC or listing at the end of this instruction manual).

- 05 - Transfer to psychiatric hospital/unit
- 06 - Died with post mortem
- 07 - Died no post mortem
- 08 - Transfer to Non-Acute hospital not in HIPE Hospital Listing - Emergency
- 09 - Transfer to Non-Acute hospital not in HIPE Hospital Listing - Non Emergency
- 10 - To rehabilitation facility (not in HIPE Hospital Listing)
- 11 - Hospice (not in HIPE Hospital Listing)
- 12 - Prison
- 13 - Absconded
- 14 - Other (e.g. Foster care)

↓  
**8. Date of Birth**

The date of birth is stored as 8 digits (dd/mm/yyyy). It is possible to key the last two digits of the year (yy) and the software will convert this to a year this century (20yy). If the date of birth is unknown the year must be estimated and entered with the day and month being keyed as 00/00 e.g. 1970 = 00/00/1970.

↓  
**9. Infant Admission Weight**

For patients aged less than 1 year of age admission weight is collected in the following circumstances:

- Required for all neonates (0-27 days old)
- Required for infants up to 1 year of age **with** admission weight less than 2,500 grams.

The value collected will be the weight in whole grams on admission. If the patient is admitted on the day of birth, the admission weight will be the birth weight.

↓  
**10. Sex**

Enter appropriate code:

- 1 - Male
- 2 - Female
- (3 - Unknown) *Rare and Unlikely*

↓  
**11. Marital Status**

Enter appropriate code:

- |             |                                |
|-------------|--------------------------------|
| 1 – Single  | 4 - Other (includes separated) |
| 2 – Married | 5 - Unknown                    |
| 3 – Widowed | 6 - Divorced                   |

↓  
**12. Medical Card Indicator**

This relates to the patient's eligibility and not to the status of bed used by the patient during the stay in hospital. If the patient has full eligibility for health services i.e. has a medical card, the coder will enter the appropriate code

- 0 - No    1 - Yes    2 – Unknown

↓  
**13. GMS Patient Number**

If a coder enters **1** (Yes) in the medical card indicator field they will then enter the GMS (General Medical Services/Medical Card) number for the patient.

## 14. Area of Residence

The area of residence code identifies the place where the person would normally reside, i.e. 'home address'. Foreign nationals now resident in this country would have a code assigned for where they now live in Ireland. Foreign visitors here for short stays would be coded to the country where they normally reside.

- ↓ **15. Patient status on discharge**
- Refers to the public/private status of the patient and not to the type of bed occupied. Either public or private must be specified.
- Enter appropriate code:
- 1 - Public
- 2 - Private
- ↓ **16. Was this a Day Case?**
- A day case is a patient who is admitted to hospital on an elective basis for care and/or treatment which does not require the use of a hospital bed overnight and who is discharged as scheduled. (*Source: Department of Health and Children, September 1993*).
- Enter appropriate code: 0 - No 1 – Yes
- ↓ **17. Day Ward Indicator**
- If the patient is identified as a day case it is necessary to** denote that the patient was admitted to a dedicated named day ward. The options presented will be
- 0 - No 1 - Yes 2 - Unknown.
- Hospitals must register their dedicated day wards with the Department of Health and Children prior to using this facility.
- ↓ **18. Day Ward Identifier (new from 1.1. 2005)**
- If the answer to Day Ward Indicator is 1 – Yes, the pre-registered Day Ward indicator must be entered to identify the day place the patient was treated in.
- ↓ **19. ITU/ICU days**
- This identifies the number of days the patient spent in an intensive care environment e.g. ICU/ITU/CCU/HDU/NITU, as an integer value.
- The midnight census will be used to determine the number of days spent in these environments.

## 20. **Admitting Consultant**

Each consultant has a unique number assigned by the ESRI which may *not* be used for any other consultant. When a new consultant takes up duty a written request for a new number is sent to the ESRI.

<p><b>Note:</b> Where the entire case is handled by one consultant his/her code number need be entered only opposite the principal diagnosis. If more than one consultant is involved in a case the relevant consultant number will be placed opposite the relevant diagnoses/procedures.</p>
---

**A specialty code is assigned to the record on the basis of the specialty assignment of the consultant associated with the principal diagnosis.** The specialty assignment of the consultant is determined locally on the basis of the listing of specialty codes compiled by the Department of Health and Children. See listing at the end of this instruction manual.

## 21. **Discharge Consultant**

This identifies the consultant who discharges the patient at the end of the episode and is identified using the same four-digit code scheme as the admitting consultant.

## 22. **Number of days in a private or semiprivate bed** (where applicable)

The midnight census will be used to determine the number of days spent in these environments.

Same day in-patient and day cases allocated a private/semi-private bed are to be counted as one private day.

## 23. **Procedure Dates**

Enter the relevant dates. Where the principal procedure was performed on the first visit to theatre the date of the principal procedure is the only date entered.

Note: If a minor procedure is performed prior to the principal procedure the date of the minor procedure will be entered as the date of the first visit to theatre and the later date of the principal procedure will be entered as the date of the principal procedure.

## 24. Ward Identification

For all discharges on or after 1<sup>st</sup> January 2007 it is mandatory to collect the admitting and discharge wards.

- Admitting ward:

The ward to which the patient is formally admitted. If the admission ward is unclear the coder should determine the ward based on the midnight census.

- Discharge ward:

The ward occupied prior to discharge.

(Source: Department of Health & Children CX06/2006)

The ward identifier can be up to 6 characters in length.

For information on downloading or keying these fields please contact the IT Department, HIPE Unit, Health Policy & Information Division, ESRI.

## 25. Temporary leave days

For all discharges on or after 1<sup>st</sup> January 2007 the number of temporary leave days will be collected to “enable the collection of information on the number of days during an in-patient stay where the patient is not in the hospital and has been temporarily sent home.” (Source: Department of Health & Children CX06/2006)

Coders will determine the number of days the patient was absent from the hospital and enter it in the box provided in w-HIPE. There will be a single HIPE record to include the total length of stay in days from the patient’s original admission to the eventual final discharge.

This field will **not** be collected where:

- A patient is considered to be “clinically discharged” but continues to reside in a bed for a number of days prior to being transferred to another facility.
- Where a patient is temporarily sent to another hospital for a day to undergo a particular procedure.
- Where the patient returns home during a day and returns before midnight.
- Where a patient returns home for more than three days and is readmitted after this.

## Batch Coding Facility for Radiotherapy and Dialysis Episodes

A W-HIPE program is available to facilitate the collection of same day radiotherapy and dialysis episodes. Please contact the HIPE Unit for information on this software.

### Optional Fields

- **Date of transfer to a Pre-Discharge Unit**

A date may be collected to identify when a patient was *transferred* to a pre-discharge unit as appropriate prior to being discharged as planned. *Hospitals must provide the Department of Health and Children with details of the Pre-Discharge Unit prior to collecting this additional field.*

By definition this will not be the same as discharge date.

e.g. A patient is transferred to the Pre-Discharge Unit of their hospital on 16<sup>th</sup> March 2007 and is discharged home from this unit 3 days later on the 19<sup>th</sup> March 2007

Date of transfer to Pre-Discharge Unit	16   03   2007
<b>Date of Discharge from Hospital</b>	<b>19</b>   <b>03</b>   <b>2007</b>

- **Number of days in a Public bed.**

The midnight census will be used to determine the number of days spent in this environment. Same day in-patients and day cases allocated a public bed count as 1 public day (optionally collected).

# DEPARTMENT OF HEALTH & CHILDREN HOSPITAL CODES

(For use with transfers)

## **Dublin and Mid Leinster Region**

- 0100 St. Mary's Hospital, Phoenix Park
