

ANNUAL REPORT AND REVIEW OF RESEARCH

For the Year ended 31 December 2001

THE ECONOMIC AND SOCIAL RESEARCH INSTITUTE

ANNUAL REPORT AND REVIEW OF RESEARCH 2001

(INCORPORATING THE ESRI FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2001)

The Council of the ESRI is the Institute's overall governing body and consists of up to 30 members appointed from the general members of the Institute. The Council meets four times a year.

THE COUNCIL

MEMBERS AT 31 DECEMBER 2001

- SIR W.G.H. QUIGLEY CB, President Former Chairman, Ulster Bank Limited
- MR J.F. HARFORD, Chairman Chief Executive, Yamanouchi Ireland Company Ltd

PROFESSOR B.J. WHELAN, Director

- MR DAVID BEGG, General Secretary, Irish Congress of Trade Unions
- MR G.T.P. CONLON, Chairman, ESRI Fund-Raising Committee, 1995-2000
- DR D. DE BUITLEIR, General Manager, Office of the Chief Executive, AIB Group plc
- PROFESSOR C. FANNING, Department of Economics, University College, Cork
- MS M. FINAN, Managing Director, Wilson Hartnell Public Relations Ltd
- DR M. GAFFNEY, Chairperson, The National Economic and Social Forum
- MR DONAL GARVEY, Director General, Central Statistics Office
- PROFESSOR P. GEARY, Department of Economics, National University of Ireland, Maynooth
- MR BRIAN GEOGHEGAN, Director of Economic Affairs, IBEC
- MR P. HARAN, Secretary General, Department of Enterprise, Trade and Employment
- MR J. HURLEY, Secretary General, Department of Finance

- MR M. KELLY, Secretary General, Department of Health and Children
- PROFESSOR A. MATTHEWS, Department of Economics, Trinity College, Dublin
- MR M.J. MEAGHER, Former Director, Bank of Ireland
- PROFESSOR S. MENNELL, Director, Institute for the Study of Social Change, University College Dublin
- MR D. NEVIN, Former General Secretary, Irish Congress of Trade Unions
- MR T.F. Ó COFAIGH, President ESRI, 1987-1995
- MR M. O'CONNELL, Governor, Central Bank of Ireland
- MS M. O'CONNOR, Partner, PricewaterhouseCoopers
- MR K. O'HARA, Chief Executive, Electricity Supply Board
- PROFESSOR W. ROCHE, The Michael Smurfit Graduate School of Business, University College Dublin
- DR R. SCHIERBEEK, Chairman, Northern Ireland Economic Research Centre
- PROFESSOR N. SHEEHY, Department of Psychology, The Queen's University of Belfast
- MR E. SULLIVAN, Secretary General, Department of Social, Community and Family Affairs
- DR T.K. WHITAKER, President ESRI, 1971-1987
- MR P.A. WHITE, Chairman, Northside Partnership Limited

The Executive Committee is a sub-committee of the Council and meets at least every two months. It acts as the Institute's Board of Directors and, in association with the Director and staff, develops the Institute's programme of research for approval by Council.

EXECUTIVE COMMITTEE

MEMBERS AT 31 DECEMBER 2001

Sir W.G.H. Quigley, CB President

Mr J.F. Harford Chairman

SIR W.G.H. QUIGLEY CB, President Former Chairman, Ulster Bank Limited

MR J.F. HARFORD, Chairman Chief Executive, Yamanouchi Ireland Company Ltd

PROFESSOR B.J. WHELAN, Director

- PROFESSOR C. FANNING, Department of Economics, University College, Cork
- PROFESSOR P. GEARY, Department of Economics, National University of Ireland, Maynooth
- MR JOHN HURLEY, Secretary General, Department of Finance
- MR D. NEVIN, Former General Secretary, Irish Congress of Trade Unions
- MR T.F. Ó COFAIGH, President ESRI, 1987-1995
- MS M. O'CONNOR, Partner, PricewaterhouseCoopers
- PROFESSOR N. SHEEHY, Department of Psychology, The Queen's University of Belfast

MR P.A. WHITE, Chairman, Northside Partnership Limited

The Economic and Social Research Institute was founded in 1960, as The Economic Research Institute, with the help of a grant from the Ford Foundation of New York. In 1966 the Institute assumed responsibility for social research and extended its title to The Economic and Social Research Institute.

The aim of the ESRI is to bring the latest thinking in economics and the social sciences to the actual and potential problems of Irish society. The Institute's research has been a vital constituent in the national debate for the past 40 years. Its goals are academic excellence, independence, objectivity, relevance to policy and widespread dissemination of results.

The Institute is a private company, limited by guarantee. It is a not for profit organisation with charitable status. The ESRI is governed by a Council consisting of up to 30 members, in addition to the President and the Director, appointed from the general members of the Institute and representative of the social partners, Government Departments, State agencies, universities and other research institutes. A committee of the Council, the Executive Committee, carries out the functions of the Institute's Board of Directors. The Institute receives an annual grant-in-aid from the Irish Government, which covered 33 per cent of total expenditure in 2001. The remainder of the Institute's income comes from commissioned research projects, sponsorship of Institute activities by Irish business, membership subscriptions and sales of publications.

The ESRI's most important resource is its research staff, whose high levels of expertise allow them to work to international standards of excellence. The results of the Institute's research have been included in over 500 reports published by the ESRI, including the *Quarterly Economic Commentary* and the *Medium-Term Review of the Irish Economy*, as well as in numerous books and articles in academic journals, published in Ireland and abroad.

;

 Γ he value of the Institute's work was well illustrated in the year 2001, which saw a transformation in the fortunes of the Irish economy. In the early months, economic expansion continued at a blistering, double-digit pace; by the end of the year the rate of growth had slowed to zero. This precipitate deceleration was attributable to the combined effects of the foot and mouth outbreak, the slowdown in the global economy (which was especially marked in the high-tech sector) and the terrorist attacks of September 11. ESRI research tracking the effects of these changes, such as the Quarterly Economic Commentary and the Medium-Term Review, were widely quoted in the media. Interviews with the authors were eagerly sought so that they could explain events and assess their implications for the country's future. The national healthcare system was also the focus for much public discussion during the year and, as described in detail below, a number of Institute publications addressed this subject. Another topic of on-going interest was the labour market and studies were carried out relating to employment forecasting, employability and the development of skills. In all, more than twenty monographs were published in addition to over eighty articles and book chapters and well over a hundred papers to conferences and learned societies.

FOREWORD

Professor Brendan J. Whelan, Director

This broad range of work, further described in the rest of this Report, clearly illustrates the Institute's mission: to deepen the understanding of Irish society and to contribute to the policy debate. It is often mistakenly believed that we are a fully funded, State-sponsored body. This is not the case. The ESRI is formally a private registered company, limited by guarantee. While an annual grant-in-aid from the Department of Finance accounts for about one-third of the organisation's costs, the bulk of them are nowadays covered by fees from commissioned work, supplemented by membership subscriptions and contributions to fund-raising initiatives. This funding structure has advantages in that it diversifies our sources of support, ensures that the research is relevant to the client's needs and that it is carried out in a timely and efficient way.

It has, however, some serious disadvantages. Our commitment to publish all work undertaken limits the type of commissioned project for which we can tender, especially on behalf of the private sector. Even public sector clients, having received a report which is satisfactory to them, are sometimes unwilling to accept the additional cost of bringing the research to peer-reviewed publication standard in terms of finish and presentation. Increasingly, national funding for academic research is directed at covering only the marginal costs of research and excludes the cost of permanent staff and other overheads. Similarly, EU research grants under the Framework programmes cover only 50 per cent of total cost, it being assumed that the balance can be obtained by the researchers from national sources. No such sources are available to the Institute.

These restrictions on sources of funding caused particular difficulties in 2001, when ESRI finances were hit by a number of cost-increasing developments, such as salary increases resulting from national agreements; the increase in employer's PRSI, the imposition of VAT on commissioned research services and increases in superannuation costs. It was only through exceptional efforts by the staff, and particularly by the Survey Unit, that sufficient new contracts were secured to limit the Institute's deficit to just over €100,000. In the longer term, if the Institute is to continue to fulfil its public-good role, it will be vital to strengthen the funding basis, particularly through increases in untied funding. The ESRI Executive has often expressed the view that the appropriate level of grant-in-aid should be closer to 50 than to 30 per cent. We would welcome the opportunity to discuss with Government how this might be achieved.

REPORT OF THE COUNCIL

THE ECONOMIC AND SOCIAL RESEARCH INSTITUTE

FORTY-SECOND ANNUAL REPORT FOR THE YEAR ENDED 31 DECEMBER 2001

MAIN ACTIVITIES DURING THE YEAR

During the year 2001, ESRI staff published twenty-six books or monographs, either in the Institute's own series or with external publishers. In addition, seventy-five journal articles or book chapters were published along with one hundred and sixty conference and other papers. Five new titles were added to the Institute's Working Papers series. The website www.esri.ie was revised and substantially expanded. As well as giving details of the Institute, it now lists all publications by series, by author and by provides research area and detailed summaries of all recent monographs. This made the publication of a separate "Review of Research" volume superfluous. The present volume therefore comprises the Report of the Council outlining the main events in the Institute during the year, a Review of Research comprising an overview of the work done in the principal research areas, and five Appendices A to E giving, respectively, the staff list, a listing of all publications produced during the year, a listing of the projects worked on in 2001, a listing of members and the Financial Statements.

Among the main events which took place during the year were the following:

In May, a conference entitled Green and Bear It? was held in the Institute. It focused on the issues which arise with the implementation of economic instruments for environmental purposes. Economists have displayed great ingenuity in devising taxation and proposals for other achieving environmental objectives. However, few of these schemes are actually implemented and the Conference tried to address the question of why this is so. Papers were presented by Irish and overseas experts and included a review of experience in the UK by Professor

David Pearce of University College London, an analysis of the situation in Ireland by officials from the OECD and a paper on "Acceptability and Implementation" by Professor Frank Convery of UCD. ESRI presenters included Professor J. Fitz Gerald, Mr. J. Hore and Mr. D. McCoy who spoke about tradable emission permits and Ms S. Scott and Mr J. Eakins who examined the effects on household income of economic instruments.

- Later that month, the Taoiseach Mr Bertie Ahern T.D. visited the Institute to launch the publication Analysis of the Economic, Employment and Social Profile of the Greater Dublin Area. This study was jointly sponsored by the three regional authorities operating in Dublin. It looked at the settlement patterns and distribution of economic activity in the region utilising new data including a comprehensive database of firms. It produced new data on commuting patterns showing that significant commuting to the city is now occurring from locations as much as 60 miles away. The study makes policy recommendations regarding clustering of settlement, urban density and other matters.
- In September, the eighth Medium-Term Review 2001-2007 of the Irish economy was launched. Appearing biennially, these Reviews are based on the ESRI's macro-economic model. They provide detailed projections of the economy for a five to ten year time horizon and contain detailed discussion of the policy options for that period. The Review 2001-2007 explored a number of scenarios and concluded that economic growth would average about 5 per cent in the period up to 2005, 4 per cent between 2005 and 2010 and thereafter revert to the EU average growth rate of about 3 per cent. It advocated a broadly neutral fiscal policy, which would represent a significant degree of restraint compared with the experience of the last five vears. It also suggested that а transparent and fair policy on immigration should be developed, that the flexibility of the labour market should be improved and that regulatory and fiscal reform should target both improvements and productivity

environmental enhancements. The *Review* received widespread media attention. Its results also feed into a number of other Institute publications including the FÁS/ESRI Manpower projections and the on-going work on energy policy.

- In October, a well attended conference, organised in collaboration with the Foundation for Fiscal Studies, took place. Entitled Budget Perspectives it focused on the economic and policy background to the forthcoming Budget and comprised four papers. The first related to the general macro-economic background to the Budget and synthesised the conclusions of the QEC and MTR. The second paper examined the constraints on Irish fiscal policy including the manner in which the EU's Stability and Growth Pact is implemented and the constraints imposed by other international developments. The third contribution used the ESRI's SWITCH model to assess the impact of changes in tax and welfare policy in the current context. The final paper presented some options for the reform and renewal of the health services.
- The Survey Unit won, on the basis of competitive tender, a contract from the Department of the Environment and Local Government to carry out the largest social survey it has ever attempted. The survey aims to provide a detailed picture of the country's dwelling stock in terms of size, quality, and amenities. A massive sample of 37,000 dwellings is to be visited and detailed analysis provided at the level of individual local authority areas. The study has required a significant expansion of the Institute's field-force and the recruitment of a large number of temporary staff to deal with the field administration, coding and data entry. It imposed considerable burdens on the staff of the Survey Unit, and on those carrying out service functions within the Institute such as accounts, catering, mail, printing and telephone services. It also required some re-location of staff between offices, especially in the case of the HIPE and NPRS Units. The Council and the Director would like to acknowledge the commitment and flexibility shown by all concerned.

- The year 2001 marked the final round of data collection for the European Community Household Panel Survey. This series of major household surveys, which have been in progress since 1994, formed the basis for a great deal of Institute work at both the national and international level. They allowed us to develop a detailed understanding of the nature of social exclusion in Ireland, the processes causing it and how all aspects of State policy impact on it. Indeed, the ECHP was the basis on which some of the key targets of the National Anti-Poverty Strategy were assessed and monitored. Having won the relevant competitively tendered contracts, ESRI staff continued to work during the year with Eurostat to develop the overall design of the instrument which will eventually replace the ECHP. This new source, to be known as EU-SILC (Statistics on Income and Living Conditions), will be implemented by the National Statistics Offices in all the Member States starting in 2003. The ESRI is collaborating closely with the Irish Central Statistics Office and interested Government Departments to ensure that the new system will produce research results relating to poverty and social exclusion of at least equal quality to those currently derived from the ECHP.
- On the international front, several staff members were appointed to important positions in international bodies. Professor John Fitz Gerald was asked to serve on the EU's Economic Advisory Group which provides direct advice to the Commission President Mr Prodi. Professor Brian Nolan was asked, in collaboration with Dr A.B. Atkinson of the UK, Professor B. Cantillon and Mr E. Marlier of Belgium to compile a report on the use of social indicators for the European Union. The Director was re-appointed for a second term to the External Advisory Group which assists the Research Directorate of the Commission in formulating those aspects of the Framework Research Programmes which are related to the social sciences. Probably the most prestigious appointment of the year Professor was the election of Christopher Whelan as Chair of the Standing Committee for the Social

Sciences of the European Science Foundation. During his three-year appointment, Professor Whelan will play a key role in developing and promoting social science research in Europe. This appointment recognises the international standing which his work, and that of the Institute, has achieved.

- The Institute continued to provide support for a number of national organisations during the vear. Secretarial and administrative services were provided free of charge to The Economic and Social Review. Mr Daniel McCoy serves as Honorary Secretary of the Statistical and Social Inquiry Society of Ireland and edits its journal. Most of the Society's meetings are held in the ESRI premises. The Institute also provides a venue for the Historical National Accounts Group and collaborates with the Foundation for Fiscal Studies in organising the annual Budget Perspectives Conference.
- Dr Alan Barrett was seconded to the Department of Finance for two years in October. It is hoped that this secondment will further enhance our collaboration with the Department. Professor Frances Ruane of Trinity College Dublin spent a four-month sabbatical at the Institute. In June, an honorary doctorate was awarded to Professor Damian Hannan by University College Dublin and an MBA was awarded to Professor John Bradley by Warwick University.

COUNCIL CHANGES

Three Council members retired during the year, Mr E. McCumiskey, Mr Alfie Kane and Mr Sean Cromien. Their dedication to the welfare of the Institute is much appreciated. Three new members were appointed to the Council: Mr David Begg of the Irish Congress of Trade Unions, Mr Brian Geoghegan of the Irish Business and Employers Confederation and Mr Donal Garvey, Director General of the Central Statistics Office. The Council also noted with deep regret the death during the year of Professor Patrick Lynch, a former Chairman of the Institute and an enthusiastic supporter of its work throughout his life. Ar dheis Dé go raibh a anam.

FINAL ACCOUNTS 2001

The Income and Expenditure Account and Balance Sheet for the year ended 31 December 2001 which have been audited by the Comptroller and Auditor General, are shown in Appendix E.

> Member of Council: J.F. Harford

> > .

Member of Council: B.J. Whelan

REVIEW OF RESEARCH BY AREA

MACROECONOMICS, ECONOMIC FORECASTING AND MODELLING

Four issues of the *Quarterly Economic* Commentary were published during the year. These traced the increasingly marked fluctuations in the Irish economy in response to developments in the global economy. They focused on factors such as domestic overheating, tightness in the labour market. the consequences for competitiveness of excessive growth in incomes and the distinction between economic growth and the more inclusive concept of development. Policy issues arising in respect of fiscal policy and the Stability and Growth Pact were also addressed. There was a healthy increase in the submission of articles from both ESRI and external contributors, seven of which were published in 2001. Four of these were published as special articles and examined, respectively, the distributional impact of the Budget, the consequences of EU enlargement, the responsiveness of labour supply and how fiscal policy can be managed in a monetary union. The other three addressed various aspects of the question "how can wage bargaining within social partnership be best modified" including mechanisms for national gainsharing, the role of personal pensions in facilitating deferred compensation and the manner in which adjustments to EMU are taking place.

The Medium-Term Review 2001-2007 explored a number of scenarios for the economy and concluded that economic growth would average about 5 per cent in the period up to 2005, 4 per cent between 2005 and 2010 and thereafter revert to the EU average growth rate of about 3 per cent. It advocated a broadly neutral fiscal policy, which would represent a significant degree of restraint compared with the experience of the last five years. It also suggested that a transparent and fair policy on immigration should be developed, that the flexibility of the labour market should be improved and that regulatory and fiscal reform should target both productivity improvements and environmental enhancements.

Macro-economic analysis was also published in a number of other books and journals, including the volume emanating from the Budget Perspectives Conference described in the previous section. An article entitled "The Single Market, the Structural Funds and Ireland's Recent Economic Growth" appeared in the Journal of Common Market Studies. Irish economic management under EMU was discussed in the Proceedings of the Brussels Economic Forum and in a book entitled The World Economy, while wage bargaining was examined in an article in the Irish Banking Review and fiscal sustainability in the Central Bank Quarterly Bulletin. Work on the application of macro-economic models originally developed in Ireland to the economies of countries in Central and Eastern Europe continued and led to a monograph published by the German Ifo Institute entitled Analysis of the Macroeconomic Impact of the CSF on the Economy of East Germany and to a number of conference papers.

ECONOMIC GROWTH, ENERGY AND RESOURCE ECONOMICS

Two articles were published in European Planning Studies on competitive advantage in sectors of the Irish economy and an article on business risk in the Journal of Economic Behaviour and Organisation. Energy and environmental issues were discussed in the volume émanating from the Green and Bear It? Conference described in the preceding section. A set of Pilot Environmental Accounts, designed to add an environmental dimension to the National Accounts, were compiled by Dr John Curtis and published by the Central Statistics Office. The environmental hazards arising from prosperity were discussed in an article in Studies and how water should be priced in a volume published by the European Union. The economic aspects of managing wild populations (of fish and deer) were addressed in journal articles, as was the methodological issue of question design in valuation surveys. Work contingent continued on issues related to energy and energy policy during the year and the funding for the Energy Policy Research was renewed. We gratefully Centre acknowledge this support from the sponsors.

REGIONAL STUDIES

Bradley edited and Professor John contributed to a book on cross-border issues entitled Can the Celtic Tiger Cross the Border? and Professor John Fitz Gerald studied the constraints on growth in the island's two economies in the Economic Outlook and Business Review. The monograph Analysis of the Economic, Employment and Social Profile of the Greater Dublin Area referred to in the preceding section examined settlement patterns and the distribution of economic activity in the region and produced new data on commuting patterns, showing that significant commuting to the city is now occurring from locations as much as 60 miles away.

TAXATION AND WELFARE

Since the early nineties, the Institute has had a substantial research programme aimed at developing a micro-simulation model which would allow us to estimate accurately the effects on individuals and households of changes in the tax and welfare systems. The resulting model, entitled SWITCH, has been used in a variety of contexts. The paper Reforming Tax and Welfare utilises the SWITCH model to carry out a detailed analysis of recent changes in the tax and welfare systems and to evaluate their effects in the light of policy objectives such as those set out in the National Anti-Poverty Strategy and the Programme for Prosperity and Fairness. On the basis of a detailed conceptual and empirical analysis, it sets out the considerable advantages of an approach to evaluation based on indexation rather than the conventional opening budget. International comparisons are provided and the key issues relating to the taxation of couples and individuals discussed. A paper on the distributional impact of direct payments on Irish farm incomes was published in the Journal of Agricultural Economics. SWITCH was also used for a special article in the QEC examining the distributional effects of Budget 2002 and in a paper for the Budget Perspectives volume.

LABOUR MARKET AND DEMOGRAPHY

The study *Family Formation in Ireland* provides an overview of existing knowledge regarding the family in Ireland today. It focuses in particular on three major issues:

the long-term decline in fertility, the growth and pattern of lone parenthood and changes in household and family size. It emphasises how poor the existing Irish data relating to the family are, and suggests how they could be improved. A more detailed comparative study of Irish fertility rates in comparative perspective was also published in *The Economic and Social Review*.

Trends in migration and related policy issues were discussed in an article published by the OECD. An article in *The Economic and Social Review* estimated the extent to which returned emigrants received a wage premium. It showed relative skill level had a positive relationship with both the decision to migrate and the decision to return.

The paper Estimating Labour Force Flows, Job Openings and Human Resource Requirements 1990-2005, published in the FÁS/ESRI Manpower Forecasting Series, utilises a novel approach by estimating gross flows in the labour force rather than concentrating on net movements only. It provides data on job openings bv occupation and sector, examines the need for migration and shows that inflows no larger than those experienced in recent years would be sufficient to meet labour force needs. The National Survey of covered all Vacancies private. nonagricultural employment and showed that the labour force was growing strongly while unemployment remains very low. About one-third of firms reported a vacancy and the vacancy rate had risen by about a sixth since the previous survey. The study gave a detailed breakdown of vacancies by occupation and sector and showed that vacancies existed in many occupations, not just in the highly skilled. An article on labour shortages in Ireland was published by the European Employment Observatory. An article on the returns to workplace training appeared in the Industrial and Labour Relations Review. A special study of workplace bullying in the was commissioned by the Task Force on the Prevention of Workplace Bullying and published by them.

Various aspects of unemployment were examined in different studies. The Policy Research paper on *Employability* considered the issue of whether the 140,000 people still on the Live Register at a time of boom contained a high proportion of "unemployables". It devised a clear operational definition of employability and, using both national and local data, concluded that the proportion of persons on the Register who could be considered unemployable was quite small - no more than about 10 per cent. It examined the factors which seem to lead to unemployability (poor education, older age, location) and considered the possibility of "profiling" those on the Register to improve the effectiveness of placement procedures jobs and training. The dynamic for processes involved in unemployment were considered in a study published by the Combat Poverty Agency while work incentives were examined in an article for The Economic and Social Review. Studies on the situation of young people moving from unemployment to employment in nine European countries were published in an edited volume and in the journal Work, Employment and Society.

EDUCATION

A good deal of previous ESRI research was directed at the situation of school leavers and the factors easing the transition from education to working life. The study Issues in the Employment of Early School Leavers looked at this topic from the employer's point of view. A detailed survey of employers showed some 70 per cent had never employed an early school leaver. Those who had recruited them mainly for lower skilled positions. They felt the main problems encountered by these young people in employment related to the poor level of education and skills attained. Employers felt that in general young people had good personal skills but needed much better pre-employment training. An article on countering social exclusion by means of early childhood education was published in a collected volume.

HEALTH

The monograph *Critique of "Shaping a Healthier Future": A Strategy for Effective Healthcare in the 1990s* evaluated the previous national health strategy as preparation for the new version which the Government was preparing. It reviewed the strategy development process and concluded that it was generally satisfactory but needed better monitoring, more specific targets and better progress in the areas of equity, quality

and accountability. It went on to review the targets and draw lessons for the new strategy. A national survey of Perceptions of the Quality of Healthcare was commissioned by the Centre for Insurance Studies in UCD. It covered topics such as respondent's health status, insurance or medical card coverage and usage of the health services. It recorded considerable criticism of the public those · whose healthcare system, but comments were most unfavourable were those with least experience of the system. Concerns centred most on waiting times, length of stay and inefficiency. Cost was the main factor deterring people from taking out medical insurance. There was strong support for spending to reduce waiting times and improve the quality of the service. An article on the use of case mix as a basis for budgeting in hospitals was published in an edited collection and a paper on health insurance and services utilisation in the journal Health Economics. A paper on methodological issues in health status measurement was published in the Irish Journal of Psychology and an analysis of employment trends and the health services in a conference volume. Work continued on the development of the databases emanating from the Hospital In-patient Enquiry and the National Perinatal Reporting System.

ECONOMETRICS AND METHODOLOGY

While the bulk of the Institute's output concentrates on the more applied and policy-relevant aspects of research, staff also contribute to the development of their specialist areas by publishing articles of methodological interest. Such work is very important both for sustaining the academic reputation of the Institute and to ensure that in our applied work we can use the latest and most refined techniques. Reference has already been made to papers on the development of technique in the areas of contingent valuation surveys and health status measurement. ESRI staff have also produced innovative measures of poverty and deprivation which have attracted considerable international attention. Further work on this topic was carried out in 2001 and will be described below. A number of papers theoretical other on and methodological themes were also produced. A study in The Economic and Social Review considered how the new technique of "propensity scores" might be used in the evaluation of State programmes. Three papers dealing with statistical methods were also produced: one on score tests published in the *Journal of Statistical Planning and Inference*, a second on the statistical properties of ratios in the *Journal of the Royal Statistical Society* Series D and a third on the analysis of capitation funding in Series A of the same journal.

PENSIONS AND RETIREMENT

A study entitled Older People's Preferences for Employment and Retirement in Ireland was commissioned and published by the National Council for Ageing and Older People. This survey discovered that, while substantial minorities of the working over 55s would like to retire, many retired people would like to do some work particularly on a part-time basis. Satisfaction with retirement was found to be strongly linked with status and whether income, health retirement was voluntary or involuntary. Respondents expressed a strong preference for gradual retirement. Papers on the housing situation of older people, on their health status and on the extent of poverty among them were published in a volume of conference proceedings. A paper on pension provision by multinational corporations in Ireland was published in an international edited volume. The volume related to the year 2000 Geary lecture, which was published during 2001, also addressed aspects of the pensions issue. The format of the lecture was changed somewhat on this occasion by having the lecture itself preceded by two related papers by local authors. The lecture was given by Professor Martin Feldstein of the US National Bureau for Economic Research and examined the economic challenges for Ireland in Europe. It suggested a role for personal pensions in facilitating effective wage setting and competitiveness. maintaining national Professor Gerard Hughes of the ESRI analysed the cost and distribution of pension expenditures. Professor Philip Lane of Trinity College Dublin looked at the management of the newly established National Pension Reserve Fund.

SOCIAL POLICY AND DISADVANTAGE

The Institute has developed a very strong presence, both nationally and internationally, in the analysis of poverty and social exclusion. The Irish National Anti-Poverty Strategy explicitly incorporates a measure of poverty devised and produced in the ESRI as one of its primary targets. This approach is now being emulated in a number of other countries. ESRI researchers have been prominent in EU work in this area and have produced both influential methodological work and definitive comparative studies across the Member States.

In 2001, two major substantive studies on poverty in Ireland were published. The Policy Research Series paper on Non-Cash Benefits and Poverty in Ireland addressed the question of whether these benefits significantly affect the estimated poverty rates. It carefully considered how the benefits could be measured and concluded that there is relatively little change in overall poverty levels when non-cash benefits are valued and included in the estimation procedure. However, since the benefits are strongly targeted towards the elderly rather than towards other groups of welfare recipients, their inclusion does matter in determining the relative poverty status of different groups. The paper on Monitoring Poverty Trends is the latest report in the annual series commissioned by the Department of Social, Community and Family Affairs. It attempts to assess progress in reaching the national targets in relation to poverty reduction. This year's report focused in particular on the processes leading individuals and households to enter, and to exit from, situations of poverty. It discovered that, as has been found in other countries, it is very important when assessing the severity of poverty to take into account its relative degree of permanence or transience. Overall, the paper concluded that, based on the measure reflecting "consistent poverty" which incorporates assessment of both income and deprivation, the situation in shown appreciable Ireland had improvement over the last number of years.

At international level, collaboration continued with colleagues in the European Panel Analysis Group (funded under the EU's Fifth Framework Programme) and a series of working papers produced, some of which have already led to publication. Four papers were published in major international journals focusing on international comparisons of poverty levels across Europe. *European Societies* published an article on poverty dynamics in European countries, while the Review of Income and *Wealth* carried an article applying measures persistent and consistent poverty of developed at the ESRI to data from almost all the EU countries. Levels of deprivation in Europe were analysed in a piece for Acta Sociologica, while the European Sociological Review published an article on income, deprivation and economic strain. Five further studies setting Ireland in comparative perspective were published in the Journal of Social Policy, Australian Social Policy, The Economic and Social Review and in two edited volumes. Three additional papers developing different aspects of the situation in Ireland appeared in Studies, Feminist Economics and The Economic and Social Review. The specific topic of poverty among children was addressed in four articles, one in New Economy and three in edited volumes.

SURVEY RESEARCH

As well as carrying out all the primary data collection required by the research work described above, the Survey Unit undertook a range of other commissioned work as listed in Appendix C below. This included the major house condition survey already mentioned as well as surveys for national organisations such as the development agencies Forfás and Enterprise Ireland and international organisations such as Eurostat Ecofin of European and DG the Commission. Methodological work on survey design and analysis, including the study of attrition in panel surveys, was also carried out. The Institute's capacity to design, conduct and analyse surveys to the highest international standards is one of the organisation's key strengths.

COUNCIL REPORT

The council members present their report and the financial statements for the year ended 31 December 2001.

Principal activities

The ESRI undertakes research designed to provide knowledge relevant to solving the major economic and social issues in Ireland.

Health & Safety

The ESRI is committed to the implementation of the requirements of the Safety, Health and Welfare at Work Act, 1989 to ensure the health and safety of all employees and visitors to the Institute. A written safety statement has been prepared and is being implemented in accordance with the Act.

Prompt Payments of Accounts Act, 1997

The ESRI is included as a listed purchaser of goods in the schedule to the Prompt Payments of Accounts Act, 1997. Since 2 January 1998 the Act has come into operation and the ESRI has complied with the provisions of the Act. In accordance with the Act and guidelines issued by the Department of Enterprise, Trade and Employment, the following information is provided.

Procedures established to ensure compliance with the Act

The ESRI has procedures in place to ensure that all invoices are paid within the time limits specified on the invoices or the statutory time limit if no period is specified. While the procedures are designed to ensure compliance with the Act, they can only provide reasonable and not absolute assurance against material non-compliance with the Act. These procedures operated in the period under review and no late payment interest has been incurred by the ESRI during the year.

Equality

The ESRI is an equal opportunities employer.

Auditors

Under Section 5 of the Comptroller and Auditor General (Amendment) Act, 1993 it is the responsibility of the Comptroller and Auditor General to audit the financial statements of the Institute.

STATEMENT OF COUNCIL RESPONSIBILITIES

The council members are required to prepare financial statements on a going concern basis which give a true and fair view of the state of affairs of the company and of the profit or loss of the company for the year. In preparing those financial statements, the council members are required to:

- select suitable accounting policies and then apply them consistently.
- make judgements and estimates that are reasonable and prudent.
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.
- disclose and explain any material departures from applicable accounting standards.

The council members are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Companies Acts, 1963 to 2001. To ensure that proper books and accounting records are kept in accordance with Section 202 of the Companies Act, 1990, the company has employed appropriately qualified personnel and has maintained appropriate computerised accounting systems. The books of account are located at the company's registered office at 4 Burlington Road, Dublin 4. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Brendan J. Whelan Council Member

Joseph F. Harford Council Member

Date: 2 August 2002

REPORT OF THE COMPTROLLER AND AUDITOR GENERAL

I have audited the financial statements on pages 58 to 67 under Section 5 of the Comptroller and Auditor General (Amendment) Act, 1993.

Respective Responsibilities of the Council Members and of the Comptroller and Auditor General

The accounting responsibilities of the Council of the Institute are set out in the Council Report on page 56. It is my responsibility, based on my audit, to form an independent opinion on the financial statements presented to me by the Council and to report on them.

Basis of Opinion

In the exercise of my function as Comptroller and Auditor General, I conducted my audit of the financial statements in accordance with auditing standards issued by the Auditing Practices Board and by reference to the special considerations which attach to State bodies in relation to their management and operation.

An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Institute's circumstances, consistently applied and adequately disclosed.

I planned and performed my audit so as to obtain all the information and explanations that I considered necessary to provide me with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement whether caused by fraud or other irregularity or error. In forming my opinion, I also evaluated the overall adequacy of the presentation of information in the financial statements.

Opinion

I have obtained all the information and explanations that I consider necessary for the purpose of my audit.

In my opinion, proper books of account have been kept by the Institute and the financial statements, which are in agreement with them and have been properly prepared in accordance with the Companies Acts 1963 to 2001, give a true and fair view of the state of the Institute's affairs at 31 December 2001 and of its deficit and cash flow for the year then ended.

In my opinion, the information given in the Council Report is consistent with the financial statements.

Gerard Smyth For and on behalf of the Comptroller and Auditor General

15 August 2002

(A Company limited by Guarantee and not having a Share Capital)

STATEMENT OF ACCOUNTING POLICIES

The principal accounting policies adopted by the company in determining the amounts included in the balance sheet and in determining the results for the year are as follows:

1. Basis of accounting

The financial statements are prepared under the accruals method of accounting and the historical cost convention.

2. Grant-in-aid

The income from this source represents the grant allocation in respect of the year.

3. Fixed assets

Tangible fixed assets are shown at cost less accumulated depreciation. Depreciation is charged in the income and expenditure account, on a straight line basis, at the annual rates set out below, so as to write-off the assets, adjusted for estimated residual value, over the expected useful life of each appropriate category.

Computer equipment	33.3%
Other equipment, fixtures and fittings	20%
	C

A full year's depreciation is provided for in the year of acquisition.

4. Leased assets

Leasing arrangements that transfer substantially all the risks and rewards of ownership to the company, finance leases, are capitalized at the arm's length cash price of the asset. The outstanding capital element of the related rental obligations is included in creditors. The excess of the total rentals payable over the amount capitalized is treated as interest and is charged to the income and expenditure account in proportion to the capital element outstanding under the lease. Rentals in respect of operating leases are charged to the profit and loss account as incurred.

5. Superannuation

The pension entitlements of employees are funded through Superannuation schemes. The pension costs relating to the schemes are assessed in accordance with the advice of qualified independent actuaries and are charged to the income and expenditure account on an accruals basis. The difference between the charges to the income and expenditure account and the contributions paid to the schemes are included as assets or liabilities in the balance sheet.

Post-retirement pension increases which are not a liability of the pension funds are paid by the ESRI.

(A Company limited by Guarantee and not having a Share Capital)

	·	387,270	387,270

14. Related Company

At 31 December 2001 the following related undertakings were in existence.

(a) Economic and Social Research Trust:

The Trust was established in 1992 as a company limited by guarantee by the ESRI (which nominates its membership) to assist by way of funding The Economic and Social Research Institute in the promotion of research. In 2001 the Trust transferred funds to the ESRI of IR£250,000/€317,435 (2000: IR£230,000/€292,040). At 31 December 2001 the company had net assets of IR£1,447,091/€1,837,427 (2000: IR£1,450,062/ €1,841,199).

(b) Economic and Social Studies: This is an associated company established in 1969 at the initiative of the ESRI to foster and promote the education of the Irish public in the social and economic sciences with particular reference to economic and social conditions in or affecting Ireland.

15. Contingent Liabilities

The council members were not aware of any material contingent liabilities at the balance sheet date.

(A Company limited by Guarantee and not having a Share Capital)

16. Pensions

Superannuation benefits are conferred by the ESRI under two superannuation schemes:

- Supervisors, Clerical and Other Administrative Staff
- Research Staff Scheme

Both schemes are defined benefit schemes. The benefits are funded by contributions from the employer and are also funded by contributions from employees in respect of spouses and children's pensions. The contributions are transferred to a managed fund administered by trustees appointed by the ESRI.

Pension increases in the Research Staff Scheme are in line with changes in salary rates in the ESRI. Under the rules of the Research Scheme the Scheme is not deemed liable for increases to pensions in payment. Such increases were historically met from Institute revenue. However, since 1 August 1993 the Institute contribution rate paid has made some allowance for some pre-funding of pension increases for active members. From 1 January 2002 it is the Institute's intention to fully pre-fund pension increases.

Actuarial Valuation

The latest actuarial valuations for the schemes were at 1 August 1999 using the attained age method of funding. The assumptions which have the most significant effect on the results of the valuation are those relating to the rate of return on investments and the rate of increase in salaries and pensions. It was assumed that the investment returns would be 7 per cent per annum, that real salary increases would be 5 per cent per annum and that present and future pensions would increase at the rate of 3.5 per cent per annum.

The total market values of the assets of the schemes at that date were IR&8,086,400/€10,267,610 (actuarial valuation was IR&7,162,100/€9,093,991). The actuarial value represented 98 per cent of the benefits that had accrued to members at the date of valuation.

Contributions and related administration costs of the superannuation funds charged for the year were IR£483,663/€614,125 of which IR£50,803/€64,507 was accrued at 31 December 2001.

FRS 17 Valuation

A new accounting standard, Financial Reporting Standard 17 – Retirement Benefits (FRS 17), was issued in November 2000. The standard has introduced significant changes in the way pension costs are dealt with. The standard does not become mandatory until 2003, however as part of the transitional provisions companies must disclose by way of note the effect on the balance sheet as at 31 December 2001 of adopting FRS 17.

The valuation used for FRS17 disclosure has been based on a full actuarial valuation at 1 August 1999 and updated at 31 December 2001 by a qualified actuary to take account of the requirements of FRS17 in order to assess the scheme liabilities at 31 December 2001. Scheme assets are stated at their market value at 31 December 2001. In accordance with the transitional arrangements for the introduction of FRS17 the following information is given by way of note only.

(A Company limited by Guarantee and not having a Share Capital)

The financial assumptions used to calculate scheme assets and liabilities under FRS17 are

Discount Rate	6.00%
Salary Increase Assumption	4.00%
Inflation	2.25%
Pension Increases	
Clerical Scheme	2.00%
Research Staff Scheme	3.00%
Expected Return on Assets	
Equities	8.50%
Bonds	5.50%
Property	7.00%
Cash	3.00%
· · · ·	

Value as at 31 December 2001

	€	IR£
Equities	6,991,405	5,506,179
Property	746,557	587,961
Bonds	2,007,633	1,581,140
Cash	495,689	390,387
Insured Assets	<u>1,143,924</u>	<u>900,913</u>
Total Market Value of Assets	11,385,208	8,966,580
Value of Past Service Liabilities	<u>(13,585,150)</u>	<u>(10,699,175)</u>
Deficit in Scheme	(2,199,942)	(1,732,595)

Included in the FRS figures is the cost of that portion of pensions, which is paid from the current revenue of the Institute rather than from the pension scheme. Also included is the cost of additional benefits introduced since the last valuation, which will be funded by the ESRI in future contributions to the scheme.

The current contribution rate paid by the Institute takes account of these additional costs with the aim of pre-funding all post retirement benefits and is deemed sufficient until the next valuation, which is due at 1 August 2002.

17. Approval of Financial Statements

The Financial Statements were approved by the Executive Committee on 2 August 2002.
